#### *Roles and Responsibilities*

- Performed preventive and corrective maintenance of medical devices.
- Conducted calibration, testing, and installation of new hospital equipment.
- Oversaw medical device inventory and documentation for audit purposes.
- Assisted in sterilization of surgical equipment, and proper labelling.
- Performed electrical repairs in various departments within the facility.

## **Industrial Attachment- Biomedical Engineering Department Naivasha Sub-County Hospital (January 2021- April 2021)**

### *Roles and Responsibilities*

- Assisted in preventive maintenance of medical equipment.
- Supported equipment inspection, troubleshooting, and repair.
- Participated in installation and routine servicing of hospital equipment.
- Maintained maintenance records and equipment documentation.
- Worked alongside biomedical engineers to improve equipment reliability and safety.

### **Additional Professional Experience**

Worked in healthcare facilities supporting health information systems, medical records management, insurance claims processing, and hospital operations, developing strong analytical, documentation, and customer service skills that complement biomedical engineering practice.

## **TECHNICAL SKILLS**

---

- Microsoft Office Proficiency

## **CERTIFICATIONS**

---

- Computer Application Packages
- Social Media & Email Marketing (HubSpot Academy)
- Orange Army Biomedical Equipment Programme- Quip Learn

## **PROFESSIONAL ATTRIBUTES**

---

- High attention to detail and data accuracy
- Strong teamwork and communication skills
- Quick learner with a passion for continuous improvement
- Able to work efficiently under minimal supervision
