Business Information Technology graduate with hands-on experience in ICT support, systems administration, hardware and software troubleshooting, and end-user support. Experienced in supporting organizational technology operations, maintaining IT infrastructure, and assisting users in resolving technical issues. Skilled in problem solving, documentation, system configuration, and stakeholder support, with a strong interest in digital banking technologies, information systems, and technology-driven service delivery.

Work Experience

ICT Intern | Council of Governors

May 2025 – June 2026

- Provide first-level ICT support to staff by troubleshooting hardware, software, network, and user-access issues, ensuring minimal disruption to business operations.
- Configure and manage high-level Microsoft Teams and Zoom meetings for committees, leadership meetings, and stakeholder engagements.
- Coordinate and provide technical support for webinars and virtual events, ensuring seamless connectivity and effective participant management.
- Monitor and maintain network connectivity and ICT infrastructure to support efficient communication and productivity across departments.
- Support users with installation, configuration, and maintenance of computer systems, software applications, and collaboration tools.
- Coordinate with external vendors on ICT equipment procurement, maintenance, and support to ensure timely service delivery.
- Prepare and maintain ICT documentation, including asset inventories, technical reports, and user support records.
- Contributed to successful ICT operations during the Devolution Conference 2025 by providing end-user support and ensuring reliable technology services.

Human Resource Attaché | Office of the Attorney General & Department of Justice

May 2023 – August 2023

- Maintained and updated employee records and databases, ensuring data accuracy, integrity, and timely retrieval of information.
- Provided technical support to HR and training committees by assisting users with computer systems, software applications, and digital tools.
- Installed, configured, and maintained software and hardware to support daily departmental operations.
- Supported payroll and employee administration processes through accurate data entry, records management, and system updates.
- Managed document tracking, filing, and registry operations, ensuring proper record maintenance and compliance with organizational procedures.
- Assisted in coordinating staff training activities and administrative processes, enhancing departmental efficiency and service delivery.

ICT Attaché | Keroka Technical Training Institute

February 2021 – May 2021

- Provided first-line ICT support to staff and students by troubleshooting hardware, software, and operating system issues, ensuring minimal disruption to learning and administrative activities.
- Installed, configured, and upgraded software applications, operating systems, and device drivers to maintain optimal system performance.
- Performed preventive maintenance, repair, and cleaning of computer hardware to improve equipment reliability and longevity.
- Supported basic network setup and connectivity troubleshooting to facilitate access to institutional ICT resources.
- Assisted in safeguarding ICT equipment through routine inspections, maintenance, and adherence to asset management procedures.
- Delivered technical assistance and user support with a strong focus on customer service, problem resolution, and effective communication.

Education Background

2022 to 2024 - Jomo Kenyatta University of Agriculture and Technology (JKUAT)

Bachelor's Degree in Business Information Technology (Second Class Upper Division)

2019 to 2021 - Jomo Kenyatta University of Agriculture and Technology (JKUAT)

Diploma in Business Information Technology (Credit)

January 2019 to March 2019 - St Ann's College

Internet and Computing Core Certification (Distinction)

2015 - 2018 - Nyambaria High School

Kenya Certificate of Secondary Education

Projects

Hospital Appointment Management System | Academic Project

Technologies: HTML, CSS, PHP, JavaScript, MySQL

- Designed and developed a web-based Hospital Appointment Management System to streamline appointment scheduling and patient record management.
- Implemented functionalities for patient registration, appointment booking, appointment tracking, and record retrieval.
- Developed a MySQL database to securely store and manage patient and appointment information.
- Applied system analysis and database design principles to improve service efficiency and reduce manual processes.

Gym Management System | Academic Project

Technologies: HTML, CSS, PHP, JavaScript, MySQL

- Designed and developed a web-based Gym Management System to automate member registration, attendance tracking, and records management.
- Created a centralized database to manage member information and support efficient data retrieval.
- Developed user-friendly interfaces to enhance system usability and user experience.
- Utilized database management and web development principles to improve operational efficiency and reporting.

Skills

- **Technical Support & ICT:** Skilled in providing end-user support, troubleshooting, and maintaining IT systems.
- **Web & Database:** Knowledge of HTML, CSS, and MySQL for basic web development and database management.
- **Productivity & Data Tools:** Proficient in Microsoft Office Suite, Google Workspace, Excel (advanced functions), and Power BI for data analysis and reporting.
- **Cybersecurity Awareness:** Familiar with fundamental cybersecurity principles and best practices.
- **Document Management:** Experienced in organizing, maintaining, and ensuring accuracy of records and documentation.
- **Communication & Teamwork:** Strong interpersonal skills, customer service orientation, and ability to collaborate effectively in team environments.
- **Learning & Adaptability:** Fast learner with the ability to quickly adapt to new technologies and processes.
