PROFESSIONAL SUMMARY

Three years at Wipro as a Software Test Engineer gave me a working understanding of technical environments that most HR professionals simply don't have. I can evaluate a technical CV with real context, hold informed conversations with engineering candidates, and bring a process rigour that comes from working in delivery teams where gaps have consequences. At Subros, I managed 25+ requisitions, screened 300+ candidate profiles across engineering and corporate functions, and simultaneously handled full-cycle recruitment and HR operations including HRIS, MIS reporting, compliance tracking, appraisal cycles, and offboarding. At Sri Anusham, I managed the HR — attrition analysis, headcount reporting, source-of-hire tracking & it comes as naturally to me as the people side, which is why I am a strong fit for roles spanning HR Recruitment, Talent Acquisition, HR Operations, Business Analytics, and People Analytics.

DUAL-TRACK CAPABILITY – AT A GLANCE

HR Recruiter Track

- Full-cycle recruitment & sourcing
- Boolean & AI-assisted search
- Competency-based interviewing
- Offer negotiation & onboarding
- Employer branding & EVP
- ATS pipeline management

HR Executive Track

- Learning & Development Mgmt.
- Employee lifecycle management
- Appraisal & engagement cycles
- Workforce dashboards & MIS
- Onboarding & offboarding ops
- Attrition & headcount analytics

WORK EXPERIENCE

HR Executive - Talent Acquisition & HR Generalist · Subros Ltd.

Jan 2026 – Apr 2026

Talent Acquisition

- Handled the full hiring cycle end-to-end — wrote the JDs, posted across Naukri and LinkedIn, screened CVs, scheduled and coordinated interviews, managed offer negotiations, and followed through to onboarding. Not a hand-off process; I owned it from open requisition to day-one joining.
- Put together competency-based screening checklists that the hiring managers actually used. Before that, shortlisting was inconsistent — different people applied different standards. The checklists cut the back-and-forth on rejections and made the interview-to-offer conversion more predictable.
- Worked directly with external staffing agencies — sent them briefs, tracked their submissions against open positions, gave structured feedback on candidates. Kept things moving without chasing.

HR Operations

- Maintained the HRIS and ran regular audits to catch data inconsistencies before they caused downstream issues in payroll or compliance. Also reconciled data coming in from outsourced agencies, which was messier than it sounds.

- Built the MIS reports and workforce dashboards that went into monthly management reviews — headcount trends, attrition rate, hiring velocity. Made sure the numbers were actually useful for decisions, not just pretty slides.
- Managed the offboarding process completely — resignation acceptance, clearance coordination, experience and relieving letter issuance. Everything documented, no loose ends.
- Tracked attendance, leave, and attrition on a regular schedule. Produced compliance reports on time, every time.

HR Trainee - HR Operations · Sri Anusham Rubber Ind. (P) Ltd
2025

Jan 2025 – Dec

- Handled the everyday HR service layer — staff queries, leave management, grievance logging and follow-up. Learned quickly that most people just want someone to actually listen and give them a straight answer.
- Wrote the onboarding and exit SOPs from scratch. The company didn't have documented processes for either — so I observed what was happening informally, structured it, and created the templates. First time both processes had been written down end-to-end.
- Assisted with candidate sourcing and initial CV screening. Early exposure to requisition management and candidate communication that gave me a feel for what full-cycle hiring actually involves.

Software Test Engineer · Wipro Technologies Ltd.

Jul 2021 – Sep 2024

- Managed 100+ client-reported defect tickets end-to-end — logging, triage, follow-up, closure with full audit trail. The same discipline now applied to recruitment requisitions: every open position tracked, updated, and never left hanging.
- Regular interface with product owners, developers, and senior client stakeholders. Cross-functional communication in a high-stakes environment — good practice for partnering with hiring managers and managing candidate expectations under pressure.
- Three years in banking and financial services applications. Means I can evaluate a tech CV with some actual knowledge of what the candidate is describing, not just keyword matching.

CORE SKILLS & TECHNOLOGY

Talent Acquisition	Full-cycle recruitment · JD crafting · Boolean & AI-assisted search · Competency-based interviewing · Structured interview design · Offer management · Onboarding · Campus hiring awareness · Volume Hiring · Bulk Recruitment · Candidate Pipeline Management · Stakeholder Management · Hiring Demand Planning · Recruitment Coordination · Candidate Experience · Background Verification · Recruitment Metrics.
HR Operations	HRIS administration · Employee lifecycle management · Payroll coordination support · Compliance tracking · Statutory documentation · HR policy rollout · Onboarding & offboarding · Grievance handling · Attendance & leave management
AI & TA Tools	AI-assisted sourcing (ChatGPT / Gemini for JDs & outreach) · LinkedIn Recruiter · Naukri · Indeed · ATS workflow management · Automated screening pipelines
People Analytics	MIS reporting · Workforce dashboards · Attrition analysis · Headcount planning · Hiring velocity · Source-of-hire analysis · Time-to-fill · Offer acceptance rate · Power BI (basic) · Excel (pivot tables, VLOOKUP, dashboards)
Employer Branding	LinkedIn content strategy · Candidate experience design · EVP communication · Job post optimisation

HR Tech	HRIS / HRMS platforms · ATS pipeline management · SAP SuccessFactors (awareness) · Zoho People (awareness) · ServiceNow (basic) · MS Office Suite · Zoom.
Soft Skills	Stakeholder & hiring manager partnering · Candidate relationship management · Negotiation · Detail orientation · Volume prioritisation · Cross-functional collaboration · Confidentiality
Languages	Tamil (Native) · English (Expert) · Hindi (DBHPS Madras Certified)

EDUCATION

MBA – HR & Business Analytics Ponjesley College of Engineering → Anna University	2024 – 2026	CGPA: 9.07 / 10
B.E. – Computer Science & Engineering Veltech Multi Tech Dr. RR & SR Engg. College → Anna University	2017 – 2021	CGPA: 7.99 / 10
HSC – Computer Science St. Tresa's Matric Hr. Sec. School → TN State Board	2016 – 2017	82.75%

KEY PROJECTS

Impact of Leader's Emotional Intelligence on Team Performance · *MBA Final Year Project, Subros Ltd., Chennai*

Looked at how leader EQ actually shows up in team performance, satisfaction, and coordination — mixed-methods research across departments at Subros. Gave me a much sharper sense of what to look for when assessing senior hires and has influenced how I think about culture fit in interviews.

Organisational Study — Sri Anusham Rubber Industries Pvt. Ltd. · *MBA Summer Internship, Nagercoil*
Mapped how departments connected (and didn't), found where communication was breaking down, and recommended process fixes. Less glamorous than it sounds — mostly a lot of listening and asking why things were done a certain way. Good grounding for workforce planning and HR ops gap analysis.

CERTIFICATIONS & TRAINING

- Certificate in C Programming — NIIT
 - Certificate in Java Programming — NIIT
 - Cambridge English Entry Level — ESOL International (Entry 2)
 - LinkedIn Recruiter: AI-Powered Talent Acquisition
-
