RE: APPLICATION FOR ACCOUNTING & ADMINISTRATION SUPPORT

Dear Hiring Manager,

I am pleased to apply for an Accounting & Administration Support role at Skillmind Software. With over seven years of combined accounting, administration and operational experience, I bring practical skills in financial records, reconciliations, accounts support, documentation, reporting and day-to-day administrative coordination. I am particularly interested in getting the opportunity because it combines finance and administration within a dynamic real estate and construction environment where accuracy, organisation and accountability are essential.

At Finsco Africa Ltd, I maintained client account and transaction records, monitored receivables, verified payment information, prepared supporting schedules and followed up outstanding balances. I also coordinated the resolution of account and payment discrepancies while maintaining organised and confidential documentation for reporting, internal controls and audit readiness. At Schafer Solutions Ltd, I provided accounting and administrative support, maintained invoices and financial records, assisted with bank and account reconciliations, supported procurement documentation, and maintained customer and supplier records. Schafer Solutions Ltd is an engineering company, and Finsco Africa is a real estate company. Both of these companies have enhanced my experience that gives me relevant exposure to an environment that is diverse. Working within an engineering setting and real estate environment strengthened my understanding of accurate documentation, coordination, financial records, procurement-related information and timely administrative support—skills I can transfer effectively to Accord Medical..

I am proficient in Microsoft Excel, Microsoft Office Suite, QuickBooks, Odoo and Zoho, and I am adaptable to new accounting and payroll systems. I also have knowledge of Kenyan accounting procedures, tax compliance documentation and eTIMS, together with strong attention to detail, confidentiality and deadline management. I would welcome the opportunity to contribute these skills to your finance and administration team.

Thank you for considering my application. I would welcome the opportunity to discuss how my accounting, administration and engineering-sector experience can contribute to your healthcare facility..

Yours sincerely,

SHARON EKADA | Finance & Administration Professional
