HR & Admin Associate at Fresh Life Initiative Limited

April 2023 – March 2024

During this period:

- I took part in HR metrics, where I analysed HR related data to achieve the requested effective output. This was mainly by use of analytical tools mostly Excel.
- Prepared reports for various departments from the HR data i.e.; Employees data, leave data etc.
- I Managed employees database which contained employees personal data, medical data, leave data, payroll data etc.
- Prepared interactive and simple summaries, and ensuring data in excel sheets is managed, updated, modified on request and making sure it's in an analysis-friendly state.
- I supported individuals within the organization with analysis tasks to achieve better results for the well-being of the company.
- Casual management; I managed casual employees in the manufacturing sector and ensured payment process is smooth and effective, and compliance with labour laws.
- DOSH; Ensured compliance with safety health steps and processes in case of an injury in the manufacturing sector.
- NITA; facilitated trainings by requesting and following up on reimbursements
- Separation process; ensured smooth transitioning out of exiting employees
- Employee benefits; I supported medical insuring process, WIBA insuring process and any other well-being insurance for the employees.
- Payroll; On request, I would offer help in the payroll process for efficiency.
- Leave management; I helped in the management and analysis of leave data.
- Conducting meetings, preparing minutes and following up on discussed tasks.
- Office administration; Being under the HR department, I would also in addition support in administering the day's office running, receiving guests, ensuring office common supplies are available for day's use.
- I assisted in any other task requested by the manager or colleagues.

HR & Admin Intern at Fresh Life Initiative Limited

Support Assistant intern at Adevia Health Kenya

March – August 2022

During that period:

- I managed clients database which contained personal information, deal stages, study progress and communications where I applied basic SQL skills.
- I manipulated nurse's data which was contained in spread sheets i.e.; marks, performance and personal information, where I used advanced excel tools for the task.
- I interacted with Customer Relationship Management software (CRM) specifically Hubspot to manage clients (nurses) steps and progress on the whole process the client undergoes in the company.
- Conducted mini-researches through questionnaires to a certain sample of nurses to test and gauge the quality of the learning content created in the organization where I could analyse the responses and present the results to the team leader suggesting applicable recommendations.
- Managed and updated the company's learning portal where I was involved in learning content creation, uploading and follow up.
- I provided support to the tutors which entailed any computer based task assistance evolving around the main Microsoft office packages; Word, Excel, PowerPoint.
- I did follow up on clients who seemed inactive in learning processes assisting them get back and continue with the program.
- Generated reports on deal stages and also performance, i.e. from assessment tests, exams and quizzes and giving the feedback to the clients.
- I carried out frequent communications i.e. emails, phone calls to the clients even abroad, and also with the employees around the various countries involved in the company for efficient coordination of the organizations functions.
- I underwent thorough training on the above; database management, SQL, advanced excel, customer management customers, data analytics, computer skills, communication skills and acquired the relevant skills from the training.
